

NOBLEWOOD 5-Year Limited Warranty

1. Noblewood guarantees its wall panels against manufacturing defects. If, upon opening a box, a panel is defective in accordance with Noblewood's stringent quality standards, return the defective panel to the nearest retailer for replacement.
2. **5 - Year Limited Structural Warranty**
Noblewood guarantees its wall panels, in their original condition, to be free from manufacturing defects for the period of 5 years from the date of retail purchase. This warranty does not include the stained color/finish (if any), which will change over time as a natural part of the aging process. This is a desirable trait of teakwood.
3. This product is flammable and its use near an important heating source (such as a fireplace or slow burning stove, etc.) is not recommended. Please check the latest construction regulations and/or fire codes in your locality for more information.
4. For installation over poured concrete or cinder block walls, wood separators (furring strips) are recommended. Direct installation on these types of walls is not covered by the warranty.
5. Given the nature of teakwood, it is possible that Noblewood wall panels may exhibit color variations from one panel to the next or from one lot to the next. Such variations may not be claimed under warranty.
6. Noblewood guarantees the conformity of its products when installed in accordance with the Noblewood Installation Manual. Failure to comply with installation instructions shall void the warranty. The Noblewood Installation Manual can be found at www.Noblewood.us/resources. Noblewood cannot be held responsible for products that are installed incorrectly.
7. By accepting and installing Noblewood wall panels, you will be deemed to have accepted the warranty terms and conditions set forth.
